Advisory Action Before the Filing of an Appeal Brief

Part of Paper No. 20050909

Continuation of 11. does NOT place the application in condition for allowance because: Applicants allege that Hitachi (JP 08211398) in figure 4 "fails to disclose gaps in adjacent dummy pattern rows, equivalent to the gaps recited in Claims 7 and 8, which include, for example, the unaligned gaps 11h of Figure 2". However, in figure 4 of Hitachi, there exists a first row of dummy patterns (8D) having a first set of gaps therebetween and second row of dummy conductors (39) having a second set of gaps therebetween. This second set of gaps is shifted from and unaligned with the first set of gaps. Thus it is deemed that this limitaiton along with the other claimed features is indeed disclosed by Hitachi. Hence the traversal on this ground is unpersuasive.
